PROFESSIONAL SUMMARY

Motivated Computer Science student with expertise in C#, C++, full-stack game tooling, and embedded systems. Proven leadership experience directing multi-developer teams, founding student organizations, and scaling software projects from concept to active beta releases. Seeking a **software development position** for after graduation to apply strong software architecture, project management, and rapid prototyping skills.

EDUCATION

University of North Texas | B.S. Computer Science (ABET-Accredited) | **GPA: 3.88** | Exp. 2027

- **Relevant Coursework:** Software Engineering, Digital Image Processing, Data Structures & Algorithms, Networking, Operating Systems, AI Fundamentals.

North Central Texas College | *Associate of Arts in General Studies* | Graduated: 2024

TECHNICAL SKILLS

- **Programming Languages:** C++, C#, Python, C, HTML/CSS, GML
 - **Frameworks & Game Engines:** Unity, Box2D, GameMaker, Custom C++ Engines
 - **Tools & Hardware:** Git, GitHub Desktop, Arduino, Raspberry Pi, Embedded Web Servers
 - **Core Concepts:** Image Processing Pipelines, Custom Tooling, Performance Optimization, Embedded Systems
 - **Soft Skills & Leadership:** Team Leadership, Project Management, Technical Communication, Planning, Public Speaking
-

TECHNICAL PROJECTS

Campaign Companion | *Founder & Lead Developer* | C#, Unity

- **Founded** Hearthlight Studios LLC and directed 3 agile teams across Software Engineering, Image Processing, and now Capstone courses (10 Developers Total); earned highest course evaluations and selected as model UNT documentation.
- **Engineered** custom C# tooling including bidirectional map-note linking, geospatial organization, biome brush image processing pipeline, and Obsidian-compatible markdown parser.
- **Scaled** an active beta testing community to 78 members on Discord through regular devlog releases and alpha builds.

2D Fantasy Platformer | *Team Developer* | C++, Custom Engine

- **Built** a complete C++ level pipeline in a minimal custom engine, integrating LDK data parsing and Box2D physics.
- **Optimized** engine rendering performance and frame rate by implementing camera-based tile culling to reduce draw calls.

Wireless DM-Controlled Magic Compass | *Embedded Systems Developer* | C++, Arduino

- **Developed** custom C++ firmware and an embedded web server on constrained hardware to deliver low-latency wireless control over physical servo movements, LED light levels, and synchronized sound effects
-

LEADERSHIP & WORK EXPERIENCE

Vice President & Co-Founder | **D20 Club (NCTC)** | Corinth, Denton, and Gainesville, TX

- Executed multi-campus recruitment and community outreach campaigns across NCTC campuses, engaging directly with students to recruit over 60 members, growing the organization into the 2nd largest student group on campus.

Percussion Masterclass Instructor | Ponder High School | Ponder, TX

- **Tailored** instructional strategies to bridge wide skill gaps across diverse experience levels (freshmen to seniors), effectively communicating complex technical and musical concepts.
- **Demonstrated** strong leadership and student engagement, resulting in measurable performance improvement across the ensemble and earning a full-time instructional offer.
